

## EQUINIX ITCONIC'S DATA CENTERS NETWORK, THE PLATFORM WHERE THINGS HAPPEN

---

Daily generated data and connectivity are companies' main values. Due to this, Carrier Neutral Data Centers have become the more efficient allies of companies and organizations in their target of finding the best way to collect and secure their data in an interconnected world.

Equinix Itconic's Neutral Data Centers platform delivers the best alternative for every type of companies in data collection, storage and processing.

- Enabling companies reduce their designing, construction and maintenance of in-house IT infrastructure cost.
- Allowing companies to adapt in a progressive and flexible manner to the cloud model: The best way of creating a connecting ecosystem between companies and cloud providers.
- Representing the best option becoming the optimal neutral interconnection platform to enable companies' intercommunication in the most effective manner.

## 1 COLOCATION SPACE

A wide variety of space options are available and can be adapted to meet specific power requirements and physical security measures of your footprint, with access to the data cabling distribution infrastructure. It can also be scaled to support your near-term growth requirements and future expansion.

### > CABINETS

Full size cabinets available, from 42U to 47U in height/standard widths of 600-800mm/depths of 1000-1200, depending on customer needs, and equipped with lock systems on each door for further physical security.

### > CAGES

For clients with specific physical security requirements or more operational space needs around their platform, cages enhance an extra level of privacy and security. Cages are made of steel mesh or, for greater privacy, solid panels. Both options with dedicated control access, giving the client full control over its space.

### > SUITES

As a cost-effective alternative to large scale deployments. In addition to the features and benefits of a cage, customized private area fully enclosed with solid partitions for a single client are also available. Providing a physical security, power and cooling infrastructure, and an extra efficiency level.

## 2 DATA CENTER ENVIRONMENT AND OPERATIONAL EXCELLENCE

Our high-reliability Data Centers provide a solid and redundant infrastructure support, flexible to adapting to business, ensuring a reliable and continuous service with the maximum certifications level as Tier IV.

### > POWER

Delivered to all facilities in a minimum N+1 configuration, with full Uninterruptible Power Supply (UPS) systems with N+1 redundancy levels or greater. Protected and backed up by generators with 24 to 48 hours of autonomy for uninterrupted service. AC power circuits (UPS A + UPS B) and DC power circuits (DC A + DC B) in various configurations of amperage/voltage are available.

### > COOLING

Stable airflow provided by HVAC system and Environmental Control in a minimum N+1 configuration, for high density loads and with the most efficient technologies.

### > FIRE DETECTION AND SUPPRESSION

Automated water mist dry pipe system and gas FE-13 pre-action fire suppression system. Conventional smoke detectors and Very Early Smoke Detection and Alarm (VESDA).

### > PHYSICAL SECURITY

Equinix Itconic offers 24x7 security management, controlling access, visits, monitoring and recording of all areas of the center.

### > STRUCTURAL SYSTEM AND FLOOD CONTROL

Equinix Itconic's Data Centers are built above sea level and away from natural disasters zones, meeting or exceeding local building specs and seismic isolation.

Operational excellence and management process are also a value of our business. With the Management & Operations (M&O) Certification by Uptime Institute, Equinix Itconic not only ensures industry-leading uptime and reliability in power, cooling and communications, but also in day-to-day operations.

## 3 OPERATION AND DISASTER RECOVERY OFFICES

Workplace space or offices for clients to deploy mission-critical operations or disaster recovery centers are available directly connected to the Meet-Me-Room. Designed to support 24-hour operations, these spaces can be adapted to clients' requirements and provides access to the same security, power, cooling and interconnection features as our colocation spaces, in order to protect a flexible range of mission-critical uses.

### BENEFITS

- **Uptime & Reliability:** Industry leading availability
- **Agility, Scalability and Flexibility:** Scalable and flexible solutions to match with business expansion when required
- **Security:** Secure environment supported by an array of resources and techniques to ensure protection to your IT platform
- **Interconnection:** Access to the largest Carrier Neutral Data Centers Network and to the main submarine cable landing points on the Iberian Peninsula

## WHY EQUINIX ITCONIC

We get companies connected to the rest of the world with the most innovative technologies through the major interconnected Data Center Platform in Spain and Portugal.

We work to move forward the digital IT Transformation processes in Telcos, Cloud Providers, Organizations and Public Administrations.

Equinix Itconic provides a complete connectivity ecosystem and services portfolio - much more than a simple data storage. This great ecosystem of our Data Centers, Network and Services Providers, Neutral Exchange Points and Cloud Services Providers ensure companies the best connectivity.

A professional qualified IT team expert in consultancy, designing, building and IT infrastructure management offer an excellent customers service to increase the efficiency of our customer's communications and IT platforms.

## WE USE RENEWABLE ENERGY

100% of our Data Centers power come from renewable energy, contributing to reduce carbon footprint. It's estimated that 2-3% of global consumed power come from IT environments. Management and decision making in our company follows our Environmental Management System certified by ISO-14001.

## CERTIFICATIONS

# ABOUT EQUINIX ITCONIC

Equinix Itconic manages neutral data centers, platforms and professional services in Spain and Portugal. It is owned by Equinix, Inc. (Nasdaq: EQIX), which connects the world's leading businesses to their customers, employees and partners inside the most interconnected data centers. In 48 markets across five continents, Equinix is where companies come together to realize new opportunities and accelerate their business, IT and cloud strategies.

Our clients benefit from the efficiencies we provide to accelerate their digital transformation. We provide a multidisciplinary team of global storage management, migration to the cloud, with maintenance and connectivity to ensure continuity and safety in IT infrastructures, 24/7.

Equinix Itconic has the largest platform for Neutral Data Centers in the Iberian Peninsula, providing interconnection within the 5 data centers in Spain and Portugal and the rest of the world. Our clients have access to the main telecommunication providers, Neutral Internet Traffic Exchange Points and leading Cloud Service providers, along with access to the main terrestrial and submarine fibre optic routes.
