

MUCH MORE THAN WIRES: ENABLING FASTER AND SIMPLE CONNECTIVITY TO AN ECOSYSTEM OF BUSINESS PARTNERS

State-of-the-art Data Centers have become essential tools for enterprise connectivity. These infrastructures are real epicenters of interconnected ecosystems connecting companies with telecom and service providers, the main IXPs and cloud computing companies.

Thanks to their central position in these ecosystems, data center customers can access to a wide range of connectivity possibilities on the same infrastructure, almost instantaneously, while increasing their ability to communicate with their environment of customers, partners and employees.

By creating our own interconnection ecosystem, our Cross Connect Service provides our clients much more than just wires. Through Equinix Itconic's Data Centers Meet-Me-Room, clients can increase their addressable market leveraging the wide range of connectivity options offered, accessing to a rich ecosystem of connectivity, with flexibility, simplicity and fast deployments.

CROSS CONNECT

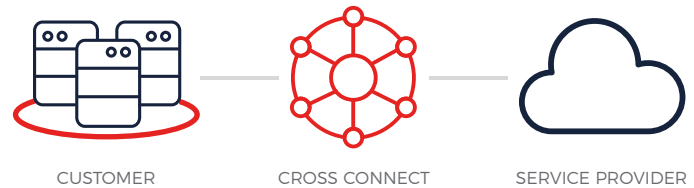

As a neutral communication point, Equinix Itconic brings together many telecommunications carriers, networks and cloud service providers under one single roof.

Equinix Itconic's Cross Connect Service enables reliable access to the providers and carriers mentioned above, and to customers and partners within the same data center, through our Local Meet-Me-Room.

The service comprises the provision of the necessary physical resources for the client's interconnection with the service provider, customer or partner requested.

All the interconnections are centralized in the MMR (Meet-Me Room) area of each data center, operated exclusively by Equinix Itconic staff. The scope of the Meet-me Room is as follows:

- › Provision, operation and maintenance of cabling connection between the client's platform and the MMR.
- › Provision, operation and maintenance of cabling connection between the MMR and the provider, customer or partner requested by the client.
- › Updated interconnections inventory.

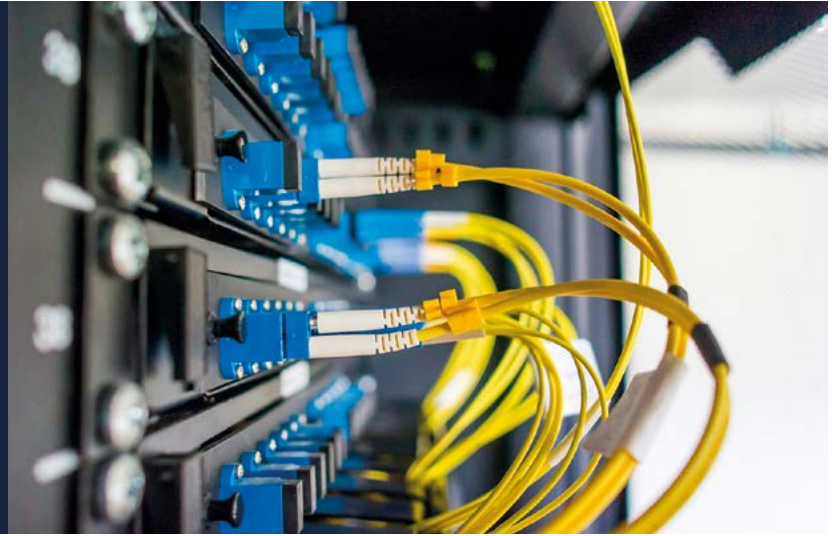

MEDIA TYPE	CONNECTOR TYPE
COAX	BNC, Siemens, microsiemens
UTP	RJ-45
Single-Mode Fiber	SC/PC o LC/PC
Multi-Mode Fiber	SC/PC, SC/APC, LC/PC, E2000/APC

*Standard connector types. Other connectors may be available under request.

BENEFITS

- **Value to your business:** Clients can rapidly access to several service providers with a very competitive rate
- **Scalability:** Best performance expanding connections, adapting to business needs
- **Simplicity and Flexibility:** Rapid deployments, typically provisioned within 24 hours
- **Real-time information:** Plan your business any time by accessing to real-time inventory through our customer portal

WHY EQUINIX ITCONIC

We get companies connected to the rest of the world with the most innovative technologies through the major interconnected Data Center Platform in Spain and Portugal.

We work to move forward the digital IT Transformation processes in Telcos, Cloud Providers, Organizations and Public Administrations.

Equinix Itconic provides a complete connectivity ecosystem and service portfolio - much more than a simple data storage. This great ecosystem of our Data Centers, Network and Services Providers, Neutral Exchange Points and Cloud Services Providers ensure companies the best connectivity.

A professional qualified IT team expert in consultancy, designing, building and IT infrastructure management offer an excellent customers service to increase the efficiency of customer's communications and IT platforms.

WE USE RENEWABLE ENERGY

100% of our Data Centers power come from renewable energy, contributing to reduce carbon footprint. It's estimated that 2-3% of global consumed power come from IT environments. Management and decision making in our company follows our Environmental Management System certified by ISO-14001.

CERTIFICATIONS

Equinix Itconic Data Centers are backed up by the main certifications of the market.

ABOUT EQUINIX ITCONIC

Equinix Itconic manages neutral data centers, platforms and professional services in Spain and Portugal. It is owned by Equinix, Inc. (Nasdaq: EQIX), which connects the world's leading businesses to their customers, employees and partners inside the most interconnected data centers. In 48 markets across five continents, Equinix is where companies come together to realize new opportunities and accelerate their business, IT and cloud strategies.

Our clients benefit from the efficiencies we provide to accelerate their digital transformation. We provide a multidisciplinary team of global storage management, migration to the cloud, with maintenance and connectivity to ensure continuity and safety in IT infrastructures, 24/7.

Equinix Itconic has the largest platform for Neutral Data Centers in the Iberian Peninsula, providing interconnection within the 5 data centers in Spain and Portugal and the rest of the world. Our clients have access to the main telecommunication providers, Neutral Internet Traffic Exchange Points and leading Cloud Service providers, along with access to the main terrestrial and submarine fibre optic routes.
