

ENSURE RELIABLE, HIGH-SPEED AND SECURE ACCESS TO THE GLOBAL INTERNET

We live in the era of connectivity. Companies and organizations face an increasingly interconnected world and need to transform their business processes to communicate in the most efficient, fast and secure way. Those companies adapting successfully to this new world are the ones making use of the best communication alternatives in an effective and flexible way.

From Equinix Itconic, we offer the very best internet access. We rely on our complete ecosystem of connectivity and our platform of five data centers to provide companies with the best possible access to different connection alternatives, optimizing the processes according to the capacity of their projects at any time. The main telecommunications providers, the IXPs of the Iberian Peninsula and the leading cloud companies. All of them are available to our customers through our Internet Access service.

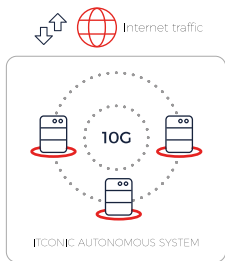

INTERNET ACCESS

Equinix Itconic's Internet Access service is a high availability, redundant, burstable bandwidth service designed to meet connectivity requirements of colocation customers. This service is provided with a variety of bandwidth and service options, through Equinix Itconic's own Autonomous System (RIPE NCC **AS15734**). A multi-homed configuration with a combination of Tier 1 Global, European and local IP Transit providers together with direct peering in Spain and Portugal Internet Exchanges (ESpanix, Catnix, Gigapix), that ensures reliable, high-speed and secure access to the global Internet.

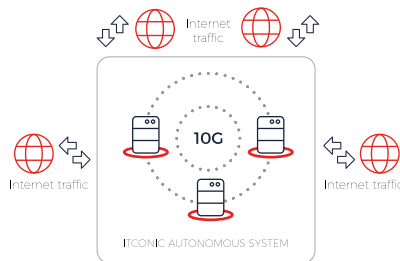

With burstable bandwidth options ranging from blocks of 5Mbps up to 10Gbps, Internet Access service is available with different types of redundancy and security management service:

CAPABILITIES	BASIC INTERNET ACCES	STANDARD INTERNET ACCES	AVANCED INTERNET ACCES
Advanced redundancy			
Tier 1 provider redundancy	No available	Included	Included
Performance			
Fixed bandwidth	Included	Included	Included
Additional IP addresses	Optional	Optional	Optional
Dynamic bandwidth	No available	Optional	Optional
Security and administration			
DDoS protection	No available	No available	Included
Intelligent bandwidth administration	No available	Optional	Optional
Certifications			
ISO/IC 20000-1; ISO/IC 27001; ISO 22301	No available	Optional	Optional

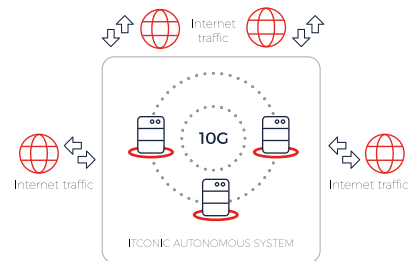

Basic Internet Acces

Standard Internet Acces

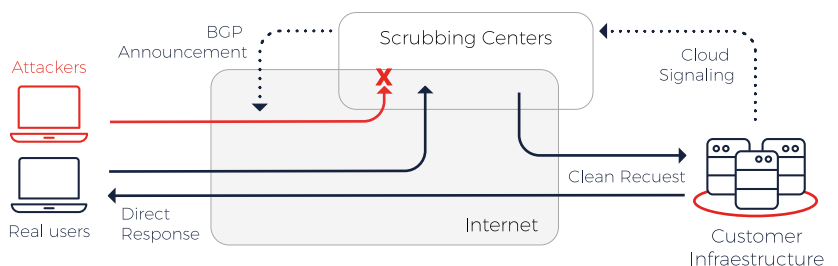

Advanced Internet Acces

Advanced Internet Access configuration includes Anti-DDoS service with the following technical features:

- › **Transparent to the client** service based on BGP redirection.
- › Protection capacity of up to **4 Tbps**.
- › Service **activated on demand**. The solution is activated only when needed.
- › Extensive protocol support (DNS, HTTP, HTTPS, FTP, SMTP, TLS, etc.).

Cloud Protection Enabled

BENEFITS

- Trusted contact point for IP service coordination
- Equinix Itconic's Autonomous System is extended across our data centers network in Iberia
- Leading Service Level Agreements that maximizing uptime and availability for the different services options available ($\geq 99.9\%$ for the Basic service; $\geq 99.999\%$ for the Standard service; 100% for the Advanced service)
- Internet Protocols IPv4 and IPv6 supported
- Fast deployment
- BGP routing
- Dynamic bandwidth service available, with the possibility of accessing to additional bandwidth beyond the contracted block
- Bandwidth reporting availability online
- Intelligent broadband administration service available

WHY EQUINIX ITCONIC

We get companies connected to the rest of the world with the most innovative technologies through the major interconnected Data Center Platforms in Spain and Portugal.

We work to move forward the digital IT Transformation processes in Telcos, Cloud Providers, Organizations and Public Administrations.

Equinix Itconic provides a complete connectivity ecosystem and service portfolio - much more than a simple data storage. This great ecosystem of our Data Centers, Network and Services Providers, Neutral Exchange Points and Cloud Services Providers ensure companies the best connectivity.

A professional qualified IT team expert in consultancy, designing, building and IT infrastructure management offer an excellent customers service to increase the efficiency of our customer's communications and IT platforms.

WE USE RENEWABLE ENERGY

100% of our Data Centers power come from renewable energy, contributing to reduce carbon footprint. It's estimated that 2-3% of global consumed power come from IT environments. Management and decision making in our company follows our Environmental Management System certified by ISO-14001.

ABOUT EQUINIX ITCONIC

Equinix Itconic manages neutral data centers, platforms and professional services in Spain and Portugal. It is owned by Equinix, Inc. (Nasdaq: EQIX), which connects the world's leading businesses to their customers, employees and partners inside the most interconnected data centers. In 48 markets across five continents, Equinix is where companies come together to realize new opportunities and accelerate their business, IT and cloud strategies.

Our clients benefit from the efficiencies we provide to accelerate their digital transformation. We provide a multidisciplinary team of global storage management, migration to the cloud, with maintenance and connectivity to ensure continuity and safety in IT infrastructures, 24/7.

Equinix Itconic has the largest platform for Neutral Data Centers in the Iberian Peninsula, providing interconnection within the 5 data centers in Spain and Portugal and the rest of the world. Our clients have access to the main telecommunication providers, Neutral Internet Traffic Exchange Points and leading Cloud Service providers, along with access to the main terrestrial and submarine fibre optic routes.
